Game port to USB Adapter user's manual

► Introduction:

The USB to Game port adapter can be used for any game port peripheral, e.g. steering wheel, joystick or gamepad, with hot pluggable connection via the USB port. The adapter has a switch enabling you to switch easily from the game and controller without having to restart the computer.

► Features:

General

- The adapter requires no calibration and complies with USB specification 1.1 and USB HID specification 1.0.
- Switch from game controller without restarting computer.
- Up to 4 drivers installed in Windows (game pad, steering wheel, joystick, etc.).
- No additional software necessary
- Support Analog game controllers.

► System Requirements:

- PUse with IBM PC compatible
- PPentium MMX 166MHz Processor or better
- P96MB RAM
- PWindows 98/98SE/ME/2000/XP
- PUSB port
- PDirect-X 7.0a or later
- Analog Game port game controllers

Direct-X version

Verify that your operating system has Direct-X 7.0a or later. If not. Download the file from Microsoft's website at www.microsoft.com.

Note

This game port adapter is not support Digital Game controller and MIDI devices

Installing the Game Port to USB Adapter:

1. Turn on your PC.
2. Plug your game controller's 15-pin male connector into the adapter's 15-pin female connector.
3. Set any mode switches on your game controller to the desired settings.
4. Slide the switch on the adapter to the desired position:
 - GAME PAD** - for game pad
 - JOYSTICK A** - for a standard joystick (Maya Fight and CH Flightstick compatibles)
 - JOYSTICK B** - for a joystick with a Thrustmaster hat switch
 - WHEEL** for a racing wheel
5. Plug the adapter's USB plug into your PC's USB port.
6. Searching for USB human interface device, New Hardware Found (or a similar message) might appear. Click Next then follow the on-screen instructions to complete the installation.

► Calibration the Game Port to USB Adapter:

For the best performance, for follow these steps to calibrate the adapter.

1. Click **Start, Settings**, then **Control panel** on your PC.
2. Double-click **Joystick** or **Game controllers**.
3. Select **USB ADAPTOR** then click **Properties**.

4. Select the **USB ADAPTOR properties** window.
5. Select **Settings** and click **Calibrate** button.

6. Calibrate your game controller according to the software's instructions, and then click **Apply** button.
7. Click **Test** and try each of the game controller's controls to make sure each one operates properly.

1. Click **OK** button. You can now use the game controller you connected to your adapter.
